

Written on the South Fork of the 002C
American River JUL 16 1999

Dear Mr. Snow,

7/12/99

I am very concerned about the environmental impacts that would be caused by the proposed CAL-FED plan. Instead of proposing more dams on rivers, which decreases water flow for recreation & wildlife habitat, I support the implementation of water conservation policies which would decrease our need for water and help us become more efficient with our use of it. I support CAL-FED's proposed restoration goals for the Central Valley, including removing some facilities such as the Englebright Dam. This dam acts as a barrier to migrating salmon, ~~see~~ which is an endangered population of fish. By removing dams such as this, we will improve habitat for fish, wildlife, & recreation.

Thank you for your time.

Sincerely,

Marilyn Latta
